(54) Title: DISTRIBUTED QUERY OF REAL WORLD OBJECTS

(57) Abstract: A look-up function and query capability of Aspects associated with Aspect Objects is enabled in a client device. A web client application such as a web browser executes in the client device. The Aspects are associated with functions of real world objects such as pumps, motors, mixing units, compressors, conveyors, transformers or switchgears. The client device does not need to be pre-loaded with any specific software relating to a Control System other than the web browser.
